

20. (New) An isolated antibody, or antigen-binding fragment thereof, according to claim 19, that specifically binds to a polypeptide having an amino acid sequence 90% identical to the amino acid sequence of SEQ ID NO: 304.

21. (New) An isolated antibody, or antigen-binding fragment thereof, according to claim 19, that specifically binds to a polypeptide having an amino acid sequence 95% identical to the amino acid sequence of SEQ ID NO: 304.

22. (New) A composition comprising a first component selected from the group consisting of physiologically acceptable carriers and immunostimulants, and a second component consisting of an antibody according to claim 18.

REMARKS

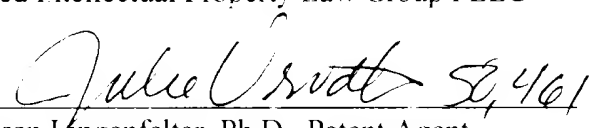

Applicants hereby elect Group III, Claims 5, and 11-in-part (c), drawn to antibodies, classified in Class 530, subclass 388.1, and SEQ ID NO:304, without traverse. Claims 5 and 11 have been cancelled. Applicants respectfully request that new claims 18-22 be added. Claims 18-22 replace claims 5 and 11 and reflect the selection of SEQ ID NO:304. It is Applicants' belief that newly added claims 18-22 correspond to Group III as defined by the Office.

Consideration of the elected and amended claims is now requested.

Respectfully submitted,

Tony N. Frudakis et al.

VERSION WITH MARKINGS TO SHOW CHANGES MADE

In the Claims:

Claims 5 and 11 have been cancelled.

New claims 18-22 have been added as follows.

18. (New) An isolated antibody, or antigen-binding fragment thereof, that specifically binds to a B305D polypeptide, wherein said B305D polypeptide is overexpressed in tumor tissue compared to normal tissue.

19. (New) An isolated antibody, or antigen-binding fragment thereof, according to claim 18, that specifically binds to a polypeptide having an amino acid sequence 80% identical to the amino acid sequence of SEQ ID NO: 304.

20. (New) An isolated antibody, or antigen-binding fragment thereof, according to claim 19, that specifically binds to a polypeptide having an amino acid sequence 90% identical to the amino acid sequence of SEQ ID NO: 304

21. (New) An isolated antibody, or antigen-binding fragment thereof, according to claim 19, that specifically binds to a polypeptide having an amino acid sequence 95% identical to the amino acid sequence of SEQ ID NO: 304.

22. (New) A composition comprising a first component selected from the group consisting of physiologically acceptable carriers and immunostimulants, and a second component consisting of an antibody according to claim 18.
